

Hier die Original Mail zum Fang:

Caught a monster Wels catfish on a Castaic 9" Hard Head Rainbow Trout pattern in the River Ebro in Spain on Monday. The guide estimated that this fish at 195 pounds and we measured it at 2.45 meters long (about 8' 4" long). It was also insanely fat and I literally could barely wrap my arms around the fish. 150 pounders are rare, but fish this size are nearly unheard of.

BTW, the lure was nearly swallowed and we first had to extricate the lure before we "planted" it back for photos. The second hook was smashed flat so we cut it off for the photos.

We also got some smaller fish at 140 - 150 cm.

Many thanks to my German guide Oli (<http://www.urlaub-nach-mass.com/>). If you ever find yourself in Spain, drive to Mequinenza and hire Oli!!!

Rick

Auch Think Big sagt Petri Heil zu diesem tollen Fang!
